Tire Science and Technology Keyword Index to Volume 38 2010

aircraft tire
Calculation of Dynamic Tire Forces from Aircraft Instrumentation Data (Gary E. McKay), 182–193 (2010)
ambient temperature
Winter Tires: Operating Conditions, Tire Characteristics and Vehicle Driving Behavior (Helge Dörrie, Carsten Schröder, and Burkhard Wies), 119–136 (2010)
balance
Uniformity: A Crucial Attribute of Tire/Wheel Assemblies (M. G. Pottinger), 24–46 (2010)
basis vector method
Unified Approach to Optimization of Tread Pattern Shape and Cross-Sectional Contour of Tires (Yoshihiro Tanaka and Katsutoshi Ohishi), 276–285 (2010)
combined-slip
A Modified Dugoff Tire Model for Combined-slip Forces (Nenggen Ding and Saied Taheri), 228–244 (2010)
computer-aided engineering
Unified Approach to Optimization of Tread Pattern Shape and Cross-Sectional Contour of Tires (Yoshihiro Tanaka and Katsutoshi Ohishi), 276–285 (2010)
contact temperature
Influence of Friction Heat on Tire Traction on Ice and Snow (M. Giessler, F. Gauterin, K. Wiese, and B. Wies), 4–23 (2010)
cornering stiffness
Winter Tires: Operating Conditions, Tire Characteristics and Vehicle Driving Behavior (Helge Dörrie, Carsten Schröder, and Burkhard Wies), 119–136 (2010)
coupling agents
Novel Coupling Agents for Silica-filled Rubbers with Superior Processing Safety and Improved Hysteresis of the Vulcanizates (M. Gerster, C. Fagouri, and E. Peregi), 80–98 (2010)
cross-sectional contour
Unified Approach to Optimization of Tread Pattern Shape and Cross-Sectional Contour of Tires (Yoshihiro Tanaka and Katsutoshi Ohishi), 276–285 (2010)
data
Calculation of Dynamic Tire Forces from Aircraft Instrumentation Data (Gary E. McKay), 182–193 (2010)
DIC
3D Digital Imaging Correlation: Applications to Tire Testing (Russ A. Moser, H. James Sube, John L. Turner, and Paul Zakelj), 100–118 (2010)
digital imaging correlation
3D Digital Imaging Correlation: Applications to Tire Testing (Russ A. Moser, H. James Sube, John L. Turner, and Paul Zakelj), 100–118 (2010)

DIC
3D Digital Imaging Correlation: Applications to Tire Testing (Russ A. Moser, H. James Sube, John L. Turner, and Paul Zakelj), 100–118 (2010)
digital imaging correlation
3D Digital Imaging Correlation: Applications to Tire Testing (Russ A. Moser, H. James Sube, John L. Turner, and Paul Zakelj), 100–118 (2010)

displacement
3D Digital Imaging Correlation: Applications to Tire Testing (Russ A. Moser, H. James Sube, John L. Turner, and Paul Zakelj), 100–118 (2010)
Dugoff tire
A Modified Dugoff Tire Model for Combined-slip Forces (Nenggen Ding and Saied Taheri), 228–244 (2010)
durability simulation
Fatigue Investigation of Elastomeric Structures (Bastian Näser, Michael Kaliske, and Will V. Mars), 194–212 (2010)
dwell-effect
Fatigue Investigation of Elastomeric Structures (Bastian Näser, Michael Kaliske, and Will V. Mars), 194–212 (2010)
elastic properties
Mathematical Model of the Effective Properties of a Fiber Reinforced Composite with a Linearly Graded Transition Zone (Carey F. Childers), 286–307 (2010)
experimental tests
A Dynamic Tire Model for ABS Maneuver Simulations (Francesco Braghin and Edoardo Sabbioni), 137–154 (2010)
fatigue
Fatigue Investigation of Elastomeric Structures (Bastian Näser, Michael Kaliske, and Will V. Mars), 194–212 (2010)
FEA
3D Digital Imaging Correlation: Applications to Tire Testing (Russ A. Moser, H. James Sube, John L. Turner, and Paul Zakelj), 100–118 (2010)
fiber/matrix bond
Mathematical Model of the Effective Properties of a Fiber Reinforced Composite with a Linearly Graded Transition Zone (Carey F. Childers), 286–307 (2010)
finite element analysis
Unified Approach to Optimization of Tread Pattern Shape and Cross-Sectional Contour of Tires (Yoshihiro Tanaka and Katsutoshi Ohishi), 276–285 (2010)
finite element method
Fatigue Investigation of Elastomeric Structures (Bastian Näser, Michael Kaliske, and Will V. Mars), 194–212 (2010)
first harmonic
Uniformity: A Crucial Attribute of Tire/Wheel Assemblies (M. G. Pottinger), 24–46 (2010)
fracture mechanics
Fatigue Investigation of Elastomeric Structures (Bastian Näser, Michael Kaliske, and Will V. Mars), 194–212 (2010)
friction heat
Influence of Friction Heat on Tire Traction on Ice and Snow (M. Giessler, F. Gauterin, K. Wiese, and B. Wies), 4–23 (2010)
handling behavior
Winter Tires: Operating Conditions, Tire Characteristics and Vehicle Driving Behavior (Helge Dörrie, Carsten Schröder, and Burkhard Wies), 119–136 (2010)

hysteresis
Novel Coupling Agents for Silica-filled Rubbers with Superior Processing Safety and Improved Hysteresis of the Vulcanizates (M. Gerster, C. Fagouri, and E. Peregi), 80–98 (2010)
ice
Influence of Friction Heat on Tire Traction on Ice and Snow (M. Giessler, F. Gauterin, K. Wiese, and B. Wies), 4–23 (2010)
inelastic material properties
Fatigue Investigation of Elastomeric Structures (Bastian Näser, Michael Kaliske, and Will V. Mars), 194–212 (2010)
limit handling
Effect of Tire Wear on Tire Force and Moment Characteristics (D. F. Tandy, Jr., R. J. Pascarella, J. W. Neal, J. M. Baldwin, and J. D. Rehkopf), 47–79 (2010)
locked wheel skid trailer
Evaluation of LuGre Tire Friction Model with Measured Data on Multiple Pavement Surfaces (M. P. Rajapakshe, M. Gunaratne, and A. K. Kaw), 213–227 (2010)
longitudinal force uniformity
Uniformity: A Crucial Attribute of Tire/Wheel Assemblies (M. G. Pottinger), 24–46 (2010)
LuGre
Evaluation of LuGre Tire Friction Model with Measured Data on Multiple Pavement Surfaces (M. P. Rajapakshe, M. Gunaratne, and A. K. Kaw), 213–227 (2010)
Magic Formula tire
A Modified Dugoff Tire Model for Combined-slip Forces (Nenggen Ding and Saied Taheri), 228–244 (2010)
match mounting
Uniformity: A Crucial Attribute of Tire/Wheel Assemblies (M. G. Pottinger), 24–46 (2010)
material force method
Fatigue Investigation of Elastomeric Structures (Bastian Näser, Michael Kaliske, and Will V. Mars), 194–212 (2010)
mathematical model
Mathematical Model of the Effective Properties of a Fiber Reinforced Composite with a Linearly Graded Transition Zone (Carey F. Childers), 286–307 (2010)
monofunctional silane
Novel Coupling Agents for Silica-filled Rubbers with Superior Processing Safety and Improved Hysteresis of the Vulcanizates (M. Gerster, C. Fagouri, and E. Peregi), 80–98 (2010)
multiple runs
Effect of Tire Wear on Tire Force and Moment Characteristics (D. F. Tandy, Jr., R. J. Pascarella, J. W. Neal, J. M. Baldwin, and J. D. Rehkopf), 47–79 (2010)
nonpneumatic wheel
Use of Orthogonal Arrays for Efficient Evaluation of Geometric Designs for Reducing Vibration of a Non-Pneumatic Wheel during High-Speed Rolling (William Rutherford, Shashank Bezgam, Amarnath Proddaturi, Lonny Thompson, John C. Ziegert, Timothy B. Rhyne, and Steven M. Cron), 246–275 (2010)

optimization
Unified Approach to Optimization of Tread Pattern Shape and Cross-Sectional Contour of Tires (Yoshihiro Tanaka and Katsutoshi Ohishi), 276–285 (2010)
orthogonal arrays
Use of Orthogonal Arrays for Efficient Evaluation of Geometric Designs for Reducing Vibration of a Non-Pneumatic Wheel during High-Speed Rolling (William Rutherford, Shashank Bezgam, Amarnath Proddaturi, Lonny Thompson, John C. Ziegert, Timothy B. Rhyne, and Steven M. Cron), 246–275 (2010)
phase
Uniformity: A Crucial Attribute of Tire/Wheel Assemblies (M. G. Pottinger), 24–46 (2010)
prediction
3D Digital Imaging Correlation: Applications to Tire Testing (Russ A. Moser, H. James Sube, John L. Turner, and Paul Zakelj), 100–118 (2010)
processing safety
Novel Coupling Agents for Silica-filled Rubbers with Superior Processing Safety and Improved Hysteresis of the Vulcanizates (M. Gerster, C. Fagouri, and E. Peregi), 80–98 (2010)
resonance
Uniformity: A Crucial Attribute of Tire/Wheel Assemblies (M. G. Pottinger), 24–46 (2010)
rolling
Use of Orthogonal Arrays for Efficient Evaluation of Geometric Designs for Reducing Vibration of a Non-Pneumatic Wheel during High-Speed Rolling (William Rutherford, Shashank Bezgam, Amarnath Proddaturi, Lonny Thompson, John C. Ziegert, Timothy B. Rhyne, and Steven M. Cron), 246–275 (2010)
silica-filled rubber compounds
Novel Coupling Agents for Silica-filled Rubbers with Superior Processing Safety and Improved Hysteresis of the Vulcanizates (M. Gerster, C. Fagouri, and E. Peregi), 80–98 (2010)
simulation
Calculation of Dynamic Tire Forces from Aircraft Instrumentation Data (Gary E. McKay), 182–193 (2010)
skid number
Evaluation of LuGre Tire Friction Model with Measured Data on Multiple Pavement Surfaces (M. P. Rajapakshe, M. Gunaratne, and A. K. Kaw), 213–227 (2010)
snow
Influence of Friction Heat on Tire Traction on Ice and Snow (M. Giessler, F. Gauterin, K. Wiese, and B. Wies), 4–23 (2010)
strain
3D Digital Imaging Correlation: Applications to Tire Testing (Russ A. Moser, H. James Sube, John L. Turner, and Paul Zakelj), 100–118 (2010)

surface strain
3D Digital Imaging Correlation: Applications to Tire Testing (Russ A. Moser, H. James Sube, John L. Turner, and Paul Zakelj), 100–118 (2010)
tire
Influence of Friction Heat on Tire Traction on Ice and Snow (M. Giessler, F. Gauterin, K. Wiese, and B. Wies), 4–23 (2010)
tire break-in
Effect of Tire Wear on Tire Force and Moment Characteristics (D. F. Tandy, Jr., R. J. Pascarella, J. W. Neal, J. M. Baldwin, and J. D. Rehkopf), 47–79 (2010)
tire force and moment measurements
The Impact of Tire Measurement Data on Tire Modeling and Vehicle Dynamics Analysis (Thomas Hüsemann and Mark Wöhrmann), 155–180 (2010)
tire friction
Calculation of Dynamic Tire Forces from Aircraft Instrumentation Data (Gary E. McKay), 182–193 (2010)
Evaluation of LuGre Tire Friction Model with Measured Data on Multiple Pavement Surfaces (M. P. Rajapakshe, M. Gunaratne, and A. K. Kaw), 213–227 (2010)
tire measurements
The Impact of Tire Measurement Data on Tire Modeling and Vehicle Dynamics Analysis (Thomas Hüsemann and Mark Wöhrmann), 155–180 (2010)
tire model
A Dynamic Tire Model for ABS Maneuver Simulations (Francesco Braghin and Edoardo Sabbioni), 137–154 (2010)
A Modified Dugoff Tire Model for Combined-slip Forces (Nenggen Ding and Saied Taheri), 228–244 (2010)
tire modeling
The Impact of Tire Measurement Data on Tire Modeling and Vehicle Dynamics Analysis (Thomas Hüsemann and Mark Wöhrmann), 155–180 (2010)
tire simulation
The Impact of Tire Measurement Data on Tire Modeling and Vehicle Dynamics Analysis (Thomas Hüsemann and Mark Wöhrmann), 155–180 (2010)
tire temperature
Winter Tires: Operating Conditions, Tire Characteristics and Vehicle Driving Behavior (Helge Dörrie, Carsten Schröder, and Burkhard Wies), 119–136 (2010)
tire test rigs
The Impact of Tire Measurement Data on Tire Modeling and Vehicle Dynamics Analysis (Thomas Hüsemann and Mark Wöhrmann), 155–180 (2010)
tire tread pattern
Unified Approach to Optimization of Tread Pattern Shape and Cross-Sectional Contour of Tires (Yoshihiro Tanaka and Katsutoshi Ohishi), 276–285 (2010)

tire wear
Effect of Tire Wear on Tire Force and Moment Characteristics (D. F. Tandy, Jr., R. J. Pascarella, J. W. Neal, J. M. Baldwin, and J. D. Rehkopf), 47–79 (2010)
tire-wheel interaction
Uniformity: A Crucial Attribute of Tire/Wheel Assemblies (M. G. Pottinger), 24–46 (2010)
traction
Influence of Friction Heat on Tire Traction on Ice and Snow (M. Giessler, F. Gauterin, K. Wiese, and B. Wies), 4–23 (2010)
transient maneuver
A Dynamic Tire Model for ABS Maneuver Simulations (Francesco Braghin and Edoardo Sabbioni), 137–154 (2010)
transient temperature increase
Influence of Friction Heat on Tire Traction on Ice and Snow (M. Giessler, F. Gauterin, K. Wiese, and B. Wies), 4–23 (2010)
vehicle dynamics
Winter Tires: Operating Conditions, Tire Characteristics and Vehicle Driving Behavior (Helge Dörrie, Carsten Schröder, and Burkhard Wies), 119–136 (2010)
vehicle dynamics analysis
The Impact of Tire Measurement Data on Tire Modeling and Vehicle Dynamics Analysis (Thomas Hüsemann and Mark Wöhrmann), 155–180 (2010)
vehicle modeling
The Impact of Tire Measurement Data on Tire Modeling and Vehicle Dynamics Analysis (Thomas Hüsemann and Mark Wöhrmann), 155–180 (2010)
wheel runout
Uniformity: A Crucial Attribute of Tire/Wheel Assemblies (M. G. Pottinger), 24–46 (2010)
winter surface
Influence of Friction Heat on Tire Traction on Ice and Snow (M. Giessler, F. Gauterin, K. Wiese, and B. Wies), 4–23 (2010)
winter tires
Winter Tires: Operating Conditions, Tire Characteristics and Vehicle Driving Behavior (Helge Dörrie, Carsten Schröder, and Burkhard Wies), 119–136 (2010)
